THE REGULAR MEETING OF THE BOARD OF DIRECTORS
OF STOCKTON EAST WATER DISTRICT WAS HELD AT THE DISTRICT OFFICE
6767 EAST MAIN STREET, STOCKTON, CA
ON TUESDAY, MAY 14, 2024 AT 12:30 P.M.

A. PLEDGE OF ALLEGIANCE AND ROLL CALL

President Atkins called the regular meeting to order at 12:30 p.m., and Manager Hopkins led the Pledge of Allegiance.

Present at roll call at the District were Directors Atkins, Cortopassi, McGurk, Panizza, Sanguinetti and Watkins. Also present were Manager Hopkins, Assistant Manager Vega, Finance Director Ram, Water Operations Manager Wunderlich, Administrative Assistant Rodriguez, Legal Counsel Zolezzi and Consultant Barkett. Director Nakaue was absent.

B. CONSENT CALENDAR (None)

C. PUBLIC COMMENT (None)

D. SCHEDULED PRESENTATIONS AND AGENDA ITEMS

1. Minutes 04/30/24 Regular Meeting

A motion was moved and seconded to approve the April 30, 2024 Minutes, as presented.

Roll Call:

Ayes: Atkins, Cortopassi, McGurk, Panizza, Sanguinetti, Watkins

Nays: None

Abstain: None

Absent: Nakaue

2. Warrants – California Public Employees’ Retirement System

A motion was moved and seconded to approve the May 14, 2024 California Public Employees’ Retirement System, as presented.

Roll Call:

Ayes: Atkins, Cortopassi, McGurk, Panizza, Sanguinetti, Watkins

Nays: None

Abstain: None

Absent: Nakaue

3. Warrants

- a. Fund 68 – Municipal & Industrial Groundwater Fund
- b. Fund 70 – Administration Fund
- c. Fund 71 – Water Supply Fund
- d. Fund 89 – Fish Screen Improvement
- e. Fund 91 – Vehicle Fund
- f. Fund 94 – Municipal & Industrial Fund
- g. Payroll
- h. Summary
- i. Short Names/Acronym List
- j. SEWD Vehicles & Heavy Equipment

Director Cortopassi inquired on the expense on page 25, line item 173 for Stantec Consulting Services Inc. for WTP Master Plan progress bill 11/15/23-03/29/24 in the amount of \$179,862.58. Manager Hopkins replied there are two different bills for the master plan one is for the Water Treatment Plant Master Plan and the other one is for the Water Supply Master Plan in which they each have different consultants.

Director Panizza inquired on the expense on page 25, line item 194 Valley Landscaping & Maintenance Inc. for WTP landscaping services for April 2024 in the amount of \$2,550. Manager Hopkins replied there was a marginal increase of \$100 per month from last fiscal year to the current fiscal year.

A motion was moved and seconded to approve the May 14, 2024 Warrants, as presented.

Roll Call:

Ayes: Atkins, Cortopassi, McGurk, Panizza, Sanguinetti, Watkins

Nays: None

Abstain: None

Absent: Nakaue

4. Stockton East Water District – Consideration of Approving Van Vliet Out of District Contract
Manager Hopkins presented the Board with the Consideration of Approving Van Vliet Out of District Contract. Manager Hopkins reported the District received a request for Out of District water from a landowner in Stanislaus County. Manager Hopkins reported the District has offered the agreement for Out of District Non-Potable water service which this landowner is wanting to pursue ahead of installing their diversion facility. Manager Hopkins noted an administrative correction within the first paragraph of the first page. Staff is recommending the Board consider approving the Out of District contract, as amended.

A motion was moved and seconded to approve the Van Vliet Out of District Contract, as amended.

Roll Call:

Ayes: Atkins, Cortopassi, McGurk, Panizza, Sanguinetti, Watkins

Nays: None

Abstain: None

Absent: Nakaue

5. Stockton East Water District – Review Proposed Update to Rule 109 – Water Rights Claims Memo
Manager Hopkins presented the Board with a Review of Proposed Update to Rule 109 – Water Rights Claims Memo. Manager Hopkins reported in May 2023 District staff conducted an audit of the way Rule 109 has been applied of the past fifty years. Manager Hopkins reported staff found several discrepancies between the language of the rule and the previous generation of employees' interpretation of it. Manager Hopkins also reported staff met with the Agricultural Operations Committee several times between January and April 2024 to discuss Rule 109 entitlement discrepancies and receive direction for updating the rule. Through an iterative updating process, Rule 109 was modified to reflect the entitlement methodology historically applied by staff. The modifications include: allow non-riparian parcels to receive a riparian entitlement if the non-riparian parcels are contiguous and under the same ownership as the riparian parcel, allow any parcel bordering Mormon Slough or Calaveras River east of Bellota to receive the riparian entitlement, even if the parcel was not included in the Study, allow all parcels diverting surface water, but do not border Mormon Slough or Calaveras River east of Bellota, to receive any current entitlement. The updates to Rule 109 also include a sunset strategy for eliminating discounts applied to lands that have no appropriate water right and do not meet the State Water Resources Control Board criteria

to receive a riparian water right. Discounts to said lands will be removed if the land uses groundwater for three consecutive years, when surface water is available. Manager Hopkins also reported Rule 109 is scheduled to go out for Notice of Public hearing on Friday, May 17, and will return to the Board on Tuesday, May 28, for Board approval.

Director Watkins inquired if letters will be going out to the people involved to inform them of Rule 109 changes. Manager Hopkins replied staff will send out the letters if the Board requests such; no direction was provided.

6. Stockton East Water District – Consideration of Approving the Purchase of Watkins Low Water Crossing Project Culverts Memo

Manager Hopkins presented the Board with the Consideration of Approving the Purchase of Watkins Low Water Crossing Project Culverts Memo. Manager Hopkins reported as part of the Districts' Calaveras River Habitat Conservation Plan, the District committed to performing several fish passage improvement projects on Calaveras River and Mormon Slough with George Watkins Low Water Crossing being one of the projects. Assistant Manager Vega reported the George Watkins Low Water Crossing project is budgeted for this year and is still waiting for the 408 from the U.S. Army Corps of Engineers (USACE). Assistant Manager Vega also reported staff requested quotes from three precast manufactures and only received two, those two being from Jensen Precast which came in at \$310,492.43 and Precon Products which came in \$345,371.58. Assistant Manager Vega also reported the concrete road prism will be replaced with a set of custom precast Type 2 precast concrete culverts, with ends skewed at 45 degrees so that the culvert openings match the alignment of the channel. The new crossing will comprise of 10 culvert sections (two rows of 5), 7 feet wide, 20 feet span, and 8 feet tall. The new culverts will maintain the existing crossing's 14-foot road width. The Board of Directors (Board) approved Fiscal Year 2024-2025 budget for the George Watkins Crossing Project is \$900,000. In addition, the George Watkins Crossings received multiple grants totaling \$600,000. The Jensen Precast quote is the lowest at \$310,492.43, including shipping and tax. The remaining budget amount should be sufficient to construct the project this fiscal year. Lead time for the box culverts is approximately three months. Staff recommends the Board authorize the General Manager approve the purchase of concrete box culverts from Jensen Precast of \$310,492.43, plus a 10% contingency of \$31,049.24, for a total of \$341,541.68, and make all other necessary approvals.

Director McGurk inquired why staff went with the 45-degree angle. Assistant Manager Vega replied the 45-degree angle was part of the design Department of Water Resources (DWR) provided. Staff inquired with Department of Water Resources (DWR) to be given leeway on the design of the culverts since in the previous culverts were constructed as puzzle pieces. Manager Hopkins added one of the reasons for keeping the 45-degree angle going across the slough is the turning radius for the trucks which have to use the low water crossing.

Director Atkins inquired if the District has purchased from Jensen before. Manager Hopkins replied the District purchased the concrete flumes for the CCTR Railroad Bridge.

Director Cortopassi inquired how many culverts will be purchased. Assistant Manager Vega replied 10 culvert sections. Discussion followed.

A motion was moved and seconded to authorize the General Manager approve the purchase of concrete box culverts from Jensen Precast in the amount of \$310,492.43, plus a 10% contingency of \$31,049.24, for a total of \$341,541.68, and make all other necessary approvals, as presented.

Roll Call:

Ayes: Atkins, Cortopassi, McGurk, Panizza, Sanguinetti, Watkins
Nays: None
Abstain: None
Absent: Nakau

7. Stockton East Water District – Discussion of Potential Memorial for Lorelee McGaughey Memo
Manager Hopkins presented the Board with a Potential Memorial for Lorelee McGaughey Memo. Manager Hopkins reported staff have received a few inquirers about dedicating a memorial to the District’s late Director, Lorelee McGaughey, since similar dedications have been made for other prior directors. Manager Hopkins reported the current memorial suggestions include dedication of a park bench or street name. The park bench could be located behind the Administration building within the pergola. The District’s recent use of the north site shop building has identified the need for a roadway name to better facilitate herbicide deliveries.

Director Watkins commented with the new security gates being installed outside people will not have access to the north site roadway.

Director Sanguinetti suggested naming the Sodium Hypo Chlorite after Lorelee McGaughey since she was present for approval and during the construction process of the building.

Director Panizza suggested a higher quality sign than the signage at Al Bonner Way and New Water Lane since existing signs are difficult to identify.

No action was taken, and the Discussion of Potential Memorial for Lorelee McGaughey Memo will be brought back to the May 21st Regular Board Meeting. Discussion followed.

E. COMMITTEE REPORTS

1. Central San Joaquin Water Conservation District and Stockton East Water District Committee Meeting, 05/01/24
Directors McGurk, Atkins, Cortopassi, Manager Hopkins, Assistant Manager Vega, and Finance Director Ram attended the Central San Joaquin Water Conservation District and Stockton East Water District Committee Meeting. Director McGurk reported during the meeting it was decided Central San Joaquin Water Conservation District (CSJWCD) was going to have a Board meeting and develop a written response to what the Stockton East Water District (SEWD) Ad-HOC Committee presented at the meeting. Director McGurk also reported CSJWCD and SEWD will meet once again when the District receives CCSJWCD's written response. Director Atkins reported CSJWCD reported they have projects but they did not elaborate on the projects.

Director Panizza inquired who was absent at the meeting. Director McGurk replied Grant Thompson was absent, therefore, CSJWCD did not have a full quorum. Discussion followed.
2. San Joaquin County and Delta Water Quality Coalition Steering Committee Meeting, 05/13/24
Director Atkins reported this meeting was cancelled.

F. REPORT OF GENERAL MANAGER

1. Water Supply Report as of 04/30/24
Manager Hopkins provided a handout of the Water Supply Report for information only that included storage, release, and production data collected from various sources as of midnight last night.

There is 240,100AF in storage at New Hogan Reservoir. Current releases are set at 147 cfs. There is 2,066,279 AF in storage at New Melones Reservoir. Current releases are set at 1,473 cfs. Current release at Goodwin Dam to Stanislaus River is set at 1,351 cfs and release to all water users is set at 2,270 cfs. The District Water Treatment Plant (WTP) is currently processing 42 mgd. North Stockton is currently utilizing 10 mgd. South Stockton is currently utilizing 10 mgd. Cal Water is currently utilizing 20 mgd. The City of Stockton WTP is currently processing 13 mgd.

2. Information Items:

- a. Manager Hopkins noted items: F-2a.

3. Report on General Manager Activities

- a. Stockton Area Water Suppliers (SAWS) Meeting, 05/10/24

Director Atkins reported this meeting was cancelled.

- b. Stockton East Water District Activities Update

Manager Hopkins reported District staff and himself met with staff from the Urban Contractors to discuss the proposed revisions of the Water Supply Contract. Overall the District and Urban Contractors are heading towards the same direction with one potential fundamental disagreement which is the autonomy of the independent operation of the District's board.

Manager Hopkins reported the District is increasing its public engagement, specifically with the five-year GSP Update being due, there will be more activity at the Groundwater Authority level and engagement of District customers about SGMA. Manager Hopkins also reported District staff will be posting more information on the District's website, the Groundwater video is still in production and will be presented to the Board in a future meeting and banners were created for the upcoming Linden Cherry Festival parade which will also be displayed at the District.

Manager Hopkins reported the District has gained full access to the District's LinkedIn account and staff will start to post more information about the District activities and display different events. Staff has already posted a video about the Water Awareness Month on the LinkedIn account.

Manager Hopkins informed the Board of Directors the Linden Cherry Festival will take place Saturday, May 18th and opened the invitation to all who want to attend.

4. Stockton East Water Finance Update

Finance Director Ram provided an update on the budget year-to-date as of April 30, 2024, showing the budget at 8.33% and actual expenditures at 5.5%. The District is currently exceeding the budget for Training and Education in April due to association dues, and the Eastern San Joaquin Groundwater Authority (ESJGWA) cost share has increased from \$44K to \$80K compared to last year. Additionally, Finance Director Ram reported the investment income for each quarter: quarter one saw \$330,040, quarter two \$370,793, quarter three \$426,864 after moving some funds to California Class, and quarter four \$470,464. For the fiscal year 2023/2024, the District has earned \$1,598,161 in interest income compared to \$173K in fiscal year 2022/2023.

Director McGurk asked about a \$12 million check received from the Department of Water Resources (DWR). In response, Finance Director Ram clarified that when the District is awarded a grant, they only receive the portion of the funds that has been expensed by the District.

5. Stockton East Water District Treatment Plant Update
Water Operations Manager Wunderlich provided the Board with an update on the District's WTP production. Water Operations Manager Wunderlich reported for the month of April 90 samples of E coli were collected and 0 were positive. The WTP rain fall totals for the previous week was 0 inches, the District's WTP produced 2,837.1 AF and Delta Water Supply Treatment Plant produced 985.4 AF in surface water production. Cal Water produced 310 AF, City of Stockton produced 40.8 AF and the District's water treatment plant produced 0 AF in groundwater production.

G. DIRECTOR REPORTS

1. San Joaquin Council of Government – One Voice in Washington, DC, 05/06/24 – 05/09/24
Directors Atkins, Sanguinetti, Watkins and Manager Hopkins attended the One Voice in Washington, DC. Director Sanguinetti reported Director Atkins, Director Watkins, Manager Hopkins and himself had a meeting with Congressman Harder. The Directors and Manger Hopkins also met with NRCS and were informed of the Regional Conservation Partnership Program (RCPP) which is a program to further the conservation, protection and sustainable use of water, agricultural land and related natural resources on a regional or watershed scale. The available RCPP funding is about \$1.5B. Director Sanguinetti reported Manager Hopkins had a meeting with Senator Alex Padilla's staff. The Director's and Manager Hopkins attended the Baltimore Orioles vs Washington Nationals baseball game which was sponsored by San Joaquin Council of Governments and they also attended The Port of Stockton Board of Commissioners dinner at The Prime Rib. Director Sanguinetti also reported Director Atkins and Manager Hopkins received a tour of the White House and Director Atkins and himself received a tour of the National Museum of the United States Navy. Director Atkins reported San Joaquin Council of Governments met with Congressman Harder to talk about what he could do to help San Joaquin County with projects they are trying to complete and are necessary.

Director McGurk inquired if the Director's met with U.S. Army Corps of Engineers (USACE). Director Atkins replied no. Discussion followed.

2. ACWA 2024 Spring Conference & Expo, 05/07/24 – 05/09/24
Director Atkins reported Director Nakaue attended the conference and will report out at the next Regular Board Meeting.

H. COMMUNICATIONS

I. AGENDA PLANNING/UPCOMING EVENTS

1. San Joaquin County Flood Control and Water Conservation District Advisory Water Commission Meeting, 1:00 p.m., 05/15/24
2. 2024 WEF-Bay Delta Tour, 05/15/24 – 05/17/24
3. F&M Bank Annual Evening At The Ball Park, 6:00 p.m., 05/16/24
4. ACWA State Legislative Committee Meeting, 10:00 a.m., 05/17/24
5. CVP Water Association – Executive and Financial Affairs Committee Meeting, 10:00 a.m., 05/17/24

J. REPORT OF THE COUNSEL

1. CONFERENCE WITH LEGAL COUNSEL – ANTICIPATED LITIGATION Potential exposure to litigation – Government Code Section 54956.9 – three case

President Atkins adjourned the meeting to closed session at 1:31 p.m. The regular meeting reconvened at 1:38 p.m., with no reportable action.

K. ADJOURNMENT

President Atkins adjourned the meeting at 1:39 p.m.

Respectfully submitted,

Justin M. Hopkins
Secretary of the Board

Memorandum

To: Board of Directors
From: Justin M. Hopkins – General Manager
Juan M. Vega – Assistant General Manager
Date: May 21, 2024
Re: Approval of a PPA with White Pine Renewables for Solar System with (BESS)

Background

The Stockton East Water District's (District) Board of Directors (Board) formed the Electrical Power Alternatives ad-hoc Committee (Committee) to investigate the feasibility, economic viability, and operational viability of several energy-generating options to offset the District's water treatment plant's rising electricity costs incurred via PG&E. The committee met several times, on January 12, January 17, February 22, and April 29 to review the options. One of the options the committee directed staff to explore was additional generation of solar energy to offset the increasingly expensive PG&E charges.

Summary

Staff contacted several firms and received proposals from three (3): SiteLogiQ, Inc., Centrica Business Solutions, and White Pine Renewables. Each firm proposed both standalone solar options as well as options that included Battery Energy Storage Systems (BESS). Given the recent history of escalating demand charges from PG&E, the Committee expressed desire to focus on proposals that can mitigate the rising demand charges which, inherently, are proposals that include BESS.

The committee had some options to weigh with regards to the type of system that it wanted staff to proceed with: District owned equipment, or a Power Purchase Agreement (PPA). District owned equipment requires capital outlay of funds and likely financing, but also comes with the possible benefit of grants as well as up to 30% rebate for the cost of the project via direct repayment as part of the Inflation Reduction Act (IRA) of 2022. Additionally, a District-owned project also necessitates District-borne maintenance costs for upkeep of the system. On the other hand, a PPA requires no capital outlay and no maintenance costs but also does not include the potential benefit of grants or IRA direct payment rebate. Under a PPA the District simply pays for the energy received from the solar system, similar to purchasing energy from the existing solar system. Additionally, the committee also had the choice between ballasted "ground" based system and a floating solar system.

After staff presentations and Committee discussions, the Committee directed staff to present a proposal for a Power Purchase Agreement with White Pine Renewables for its ground mounted (ballasted) system with BESS to the full Board.

A presentation from White Pine Renewables with additional details directly follows this memorandum.

Financial Impact

Based on District staff analysis, the proposal from White Pine Renewables for a ground mounted (ballasted) system with BESS produced the most savings of any of the proposals.

The execution of a PPA does not require capital outlay or financing of any sort. The District will simply purchase power from the White Pine Renewables solar system with BESS once it is installed and operational at a lower rate than the power purchased from PG&E. As such, no negative budgetary impact is expected.

Recommendations

Consistent with the recommendation of the committee, District staff respectfully recommends the Board authorize the General Manager to approve a Power Purchase Agreement with White Pine Renewables for a cost per Kilowatt-Hour of \$0.174 for year one and a yearly escalation factor of 1.90% and make all other necessary approvals.

Memorandum

To: Board of Directors
From: Justin M. Hopkins, General Manager
Date: May 21, 2024
Re: Approval of Memorial for Late District Director Lorelee McGaughey

Background

On May 14, 2024, Stockton East Water District (District) staff discussed with the Board of Directors (Board) the proposed dedication of a memorial to the District's late Director, Lorelee McGaughey. Feedback provided by the Board included dedication of the sodium hypochlorite facility or a courtyard style bench.

Summary

The proposed courtyard style bench (Figure 1) is six (6) feet wide, made of metal, provided with a protective coating, and commercial quality. Placement options for the proposed bench include the Administration parking lot, at the entrance to the Administration building, or behind the Administration building and within the pergola area. The proposed courtyard style bench costs between \$699 and \$1,315, depending on vendor. A separate engraved plate would be purchased and affixed to the bench for a nominal cost.

Figure 1. Courtyard Style Bench

Staff further discussed dedication of the sodium hypochlorite facility with a bronze plaque. The plaque varies in cost between \$200 and \$600, depending on size and amount of text. Considering the sodium hypochlorite facility was previously dedicated to the full Board and adorned with a bronze plaque, staff recommends the courtyard style bench option.

Financial Impact

Funding for the memorial is available within the Fiscal Year 2024-2025 budget.

Recommendation

Staff recommends the Board authorize the purchase of the courtyard style bench for a cost not to exceed \$1,000 and requests the Board provide direction for bench placement.

Memorandum

To: Board of Directors
From: Justin Hopkins – General Manager
Date: May 21, 2024
Re: Consider Adoption of Resolution 24-25-02 Authorization to Enter into an Agreement with the USBR to Modify the Service Area as set Forth in Exhibit A of CVP Contract Number 4-07-20-W0329

Background

On June 7, 2023, the Stockton East Water District (District) requested the U.S. Bureau of Reclamation (USBR) consider modification of the District's Central Valley Project (CVP) water supply contract (Contract). The specific change requested by the District is an update of Exhibit A of the Contract, which identifies the District's service area for CVP water. The updated Exhibit A would replace the outdated, pre-2004 District boundary with the existing New Melones Reservoir place of use boundary.

Summary

On April 30, 2024, the District received a Letter of Agreement (LOA) from the USBR requesting approval to begin the Contract modification process and pre-payment of costs. As outlined within the LOA, the USBR will review the District's request, perform necessary studies, develop documentation, and conduct any needed meetings, consultations, or research. The LOA does require the District to pre-pay for the USBR services, which is estimated to not exceed \$25,000.

Financial Impact

The District is responsible for paying 100% of the actual costs incurred by the USBR to perform the CVP Contract modifications. Since actual costs will not be calculated until the Contract modification is complete, the USBR requires a deposit of \$25,000. If actual costs are projected to exceed \$25,000, USBR will request additional funding approval prior to proceeding. The District will receive reimbursement if actual costs are less than the deposit.

Funding for the CVP Contract modifications is available within the General Manager Professional Services account.

Recommendation

District staff recommends the Board of Directors adopt Resolution 24-25-02 to authorize the General Manager to enter into an agreement with the U.S. Bureau of Reclamation to modify Central Valley Project Contract Number 4-07-20-W0329.

RESOLUTION NO. 24-25-02

**RESOLUTION OF THE BOARD OF DIRECTORS
OF STOCKTON EAST WATER DISTRICT**

**AUTHORIZING THE GENERAL MANAGER TO ENTER INTO A LETTER OF
AGREEMENT WITH THE UNITED STATES BUREAU OF RECLAMATION TO
MODIFY CENTRAL VALLEY PROJECT CONTRACT NUMBER 4-07-20-W0329**

WHEREAS, Stockton East Water District maintains Central Valley Project Contract No. 4-07-20-W0329 (Contract) with the U.S. Bureau of Reclamation to receive irrigation and municipal water supply from the New Melones Reservoir; and

WHEREAS, the Contract includes an outdated Stockton East Water District service area that does not reflect boundary changes as a result of annexation or expansion of the City of Stockton urban growth boundary; and

WHEREAS, the Stockton East Water District has identified demand for surface water supplies within the region but outside of the current service area; and

WHEREAS, the Stockton East Water District recognizes the importance of increasing surface water use within the region as a necessary action to progress towards sustainability of the groundwater subbasin; and

WHEREAS, Stockton East Water District has requested the U.S. Bureau of Reclamation to affect specific changes to the Contract to allow for the supply of surface water to areas outside of the current service area; and

WHEREAS, the U.S. Bureau of Reclamation has agreed to commence with the Contract modification process and will perform reviews, meetings, consultations, research, environmental document development, and other activities required to ensure compliance with state and Federal law; and

WHEREAS, the U.S. Bureau of Reclamation requires a deposit of \$25,000, but additional payment may be necessary from, and reimbursement of overpayment shall be provided to, Stockton East Water District depending upon the actual cost of the study.

NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of the Stockton East Water District that General Manager Justin M. Hopkins is hereby authorized to execute an agreement with the U.S. Bureau of Reclamation to perform work necessary to modify Central Valley Project Contract Number 4-07-20-W0329 and is further authorized to make any approvals and payments related thereto.

PASSED AND ADOPTED at a regular meeting by the Board of Directors of the Stockton East Water District on the 21st day of May 2024 by the following vote of the members thereof:

JHopkins@sewd.net

Subject: Letter of Agreement Letter 24-WC-20-6307 (LOA). Establishing a Reimbursable Account for the Request to Modify Stockton East Water District's (District) Service Area as set Forth in Exhibit A of the District's Central Valley Project (CVP) Contract Number 4-07-20-W0329 (Contract).

Dear Mr. Hopkins:

The Bureau of Reclamation (Reclamation) received the District's June 7, 2023, letter requesting to reinstate its request for inclusion of lands currently outside of the District's service area. The purpose of this LOA is to obtain agreement from the District to pay, in advance, the costs incurred by Reclamation, which may include, but are not limited to, review of the inclusion proposal; the development and/or review of all environmental documentation necessary for compliance with National Environmental Policy Act and the Endangered Species Act; meetings, consultations and research, other activities required to ensure compliance with state and Federal law, and administrative and overhead costs expended by Reclamation; preparation of the approval letter if Reclamation determines it can approve the proposed inclusion/exclusion.

By counter signing this LOA, the District agrees to the following conditions:

1. The District shall submit to Reclamation an initial advance deposit of \$25,000 to be deposited into an account established for this action. Reclamation agrees the total cost to complete this process shall not exceed \$25,000 absent further written approval by the District.
2. Upon written request, Reclamation shall provide the District with a quarterly statement of account balance and a summary of expenses incurred by Reclamation in connection with this action. In the event Reclamation foresees expenditures in excess of the account balance, Reclamation shall notify the District of the need for additional deposits in excess of the foregoing amount and shall provide the District with a detailed itemization of anticipated expenditures, and the District shall pay the amount requested to Reclamation within 10 days of the request.
3. At the District's request, Reclamation shall provide a detailed record of actual costs incurred by Reclamation within 60 days of such request.

4. This LOA is effective as of the date signed by the District and will remain in effect until July 31, 2029, or this letter agreement is terminated by either party upon 30 days written notice to the other party, provided that the District shall submit additional funds if needed, to pay Reclamation's costs up to date of termination. Any excess funds in the account will be refunded to the District within 60 days after termination of this LOA.

Please have the appropriate individual sign this LOA, provide documentation which authorizes the individual to sign on behalf of the District, and return the signed LOA and the requested documentation to the Bureau of Reclamation, Central California Area Office, 7794 Folsom Dam Road Folsom, CA 95630, Attention: Mr. Tom Nichols, or e-mail to tenichols@usbr.gov.

A down payment (DP) invoice will be forwarded to you via email. You have the option of sending the check via United States Postal Service mail or via overnight mail. Please remit the DP invoice and the check directly to the appropriate bank lockbox address that is imprinted on the invoice. Reclamation will forward DP invoices for subsequent advance requests. Please retain the copies for your records.

If you have any questions, please contact Mr. Tom Nichols, Supervisory Repayment Specialist at tenichols@usbr.gov or at (916) 537-7050.

Sincerely,

Drew Lessard
Area Manager

Historic 2023 Water Year Delivered Big Boost To California's Groundwater Supplies

California Department of Water Resources, 05/06/24

The California Department of Water Resources (DWR) has released the latest Semi-Annual Groundwater Conditions report, and the data show that California achieved 4.1 million acre-feet of managed groundwater recharge during Water Year 2023, which is nearly the water storage capacity of Shasta Lake. The report also details an increase in groundwater storage of 8.7 million acre-feet.

Water Year 2023 is the first year since 2019 that there has been a reported increase in groundwater storage. A significant reduction in groundwater pumping in 2023 also led to favorable groundwater conditions, including a decrease in land subsidence, or sinking of the land. Some areas that had previously experienced subsidence actually saw a rebound (uplift) in ground surface elevation from reduced pumping in the deeper aquifers and refilling of groundwater storage.

The groundwater report released today includes, for the first time, groundwater sustainability plan Annual Report data reported by local groundwater sustainability agencies (GSAs) across 99 groundwater basins which make up over 90 percent of the groundwater use in the State.

Groundwater is one of California's most important natural resources and, more likely than not, groundwater is part of your life. Nearly 85 percent of Californians depend on groundwater for some portion of their water supply, and in dry years when surface water supplies are lacking, communities turn to groundwater to fulfill the needs of households, agriculture, and businesses. California's rich and abundant ecosystems also rely on groundwater to sustain the natural plant and animal communities that make California such an exceptional place to live, work and recreate.

While the last two rainy seasons have been good news for California's groundwater basins, there is still a lot of work to do. Long-term groundwater storage remains in a deficit of nearly 40 million acre-feet over the past two decades, due in part to years of pumping out more water than has been replenished. It would take nearly five consecutive above average, not just average, water years like 2023 to fill that gap. California needs to replenish what nature provides by expanding groundwater recharge projects, upgrading water infrastructure, and modernizing our water distribution system through projects like the Delta Conveyance Project, to be able to move water during high flows to maximize storage.

"California is invested in preparing for weather extremes by maximizing the wet years to store as much water as possible in preparation for the dry years," said Paul Gosselin, DWR Deputy Director of Sustainable Water Management. "The impressive recharge numbers in 2023 are the result of hard work by the local agencies combined with dedicated efforts from the state, but we must do more to be prepared to capture and store water when the wet years come."

During the 2023 Water Year, more than 1.2 million acre-feet of groundwater recharge was permitted by state agencies, more than 400,000 acre-feet of flood water was recharged using the Governor's Executive Orders, and millions more acre-feet of managed and naturally occurring recharge was achieved. Groundwater recharge projects have proved critical during flood response, as we saw in 2023 when thousands of acre-feet of water were diverted off of streams, away from flood-prone areas, and put onto available open lands to recharge groundwater basins. Learn more about water infrastructure projects in your community at build.ca.gov.

Since groundwater is out of sight, beneath our feet, we need data and information from the underground aquifers to make informed groundwater management decisions that are backed by the most current science. DWR's Semi-Annual Groundwater Conditions report provides current data to support the comprehensive California's Groundwater (Bulletin 118) publication which is updated every five years. This suite of reports provides the latest knowledge and understanding about California's groundwater system, helping state and local agencies manage groundwater resources for long-term water supply resiliency.

Ten years ago, the Sustainable Groundwater Management Act was signed into law to address ongoing impacts of groundwater declines throughout the state. As a result of this important legislation, we are collectively learning more than ever before about California's groundwater basins from data being collected and reported by local GSAs as well as from state investments in new technologies and expanded groundwater monitoring.

The Semi-Annual Groundwater Conditions report includes the latest data and discussion on statewide groundwater levels, groundwater storage, recharge, land subsidence, well infrastructure and the status of California's groundwater basins. These reports are not just for water managers, they are also important resources for anyone who wants to gain an understanding of their local water supply.

Groundwater is essential for human well-being, ecosystems, agriculture, and economies. Each year we're learning more about how to address the challenges of a changing climate, and the data and information contained in DWR's Semi-Annual Groundwater Conditions report provides the latest and best understanding of the vital water resource that lies beneath our feet.

Supporting Farms And Domestic Food Production for America

Northern California Water Association, 05/15/24

In today's globalized world, ensuring that Americans can depend on local food production is more critical than ever. The California Farm Water Coalition, dedicated to raising awareness about the connection between farm water and our food supply, has released three educational fact sheets shedding light on the water needed to produce the food Californians consume daily, and the risk we face from unsustainable foreign food production.

Where Does Farm Water Go?

California's population of 39 million requires a staggering 11.3 trillion gallons of water annually to grow enough food and fiber to meet its needs, as described in the fact sheet, "Where Does Farm Water Go?". However, current water supplies fall short, leaving a gap of 38 percent between the water used to grow our food and the demand on food production by the state's population. Despite a 14 percent decline in water usage by California farms over the past 35 years, the growing population will require an additional 1 million acre-feet of water annually just to meet this growing food supply demand. This trend underscores the urgency of managing both water resources and food production in the face of climate uncertainty.

Sample Daily Menu

The second fact sheet, "Sample Daily Menu," breaks down the water requirements for a selection of menu items for one person over a day, based on the USDA MyPlate recipe guide. For three meals, plus snacks and beverages, the total daily water requirement to produce the menu of items amounts to 810.3 gallons per person for a single day's meals. Most people think of daily water consumption as water for cooking, cleaning, bathing, and outdoor watering. This insight into the water footprint using a daily menu highlights the significance of nutrition as a significant part of our daily water demand.

Why Local Production Matters

America's grocery stores may seem brimming with fresh fruits and vegetables year-round, but behind the vibrant displays lies a sobering truth: a significant portion of these products are imported from other countries. The third CFWC fact sheet, "Our Food Supply – Sustainability & Imports," opens the door to discussions about the policies and regulations that have made Americans more dependent on foreign-produced food.

According to data from the U.S. Department of Agriculture, a staggering 60.9% of the fresh fruit and 38.8% of the fresh vegetables consumed in the United States are sourced from abroad.

That's a 228% increase of fruit and 479% increase of vegetable imports since 1980. This heavy reliance on imports poses a concerning risk to the security and sustainability of our

food supply, particularly given the alarming challenges overseas producers face, from political strife, war, degrading natural resources, and inconsistent food safety standards.

Unsustainable Water Use

Foreign food products have been a boon for American consumers, however, the reliance on these products come with deeper concerns: unsustainable water supplies. Of total fruit and vegetable imports, Mexico now accounts for 69 percent of fresh vegetables and 51 percent of fresh fruits that make their way to the United States. This greater dependence on foreign production has other consequences as well. Local businesses that depend on farm production lose out when agricultural production shifts to other countries, just as they did when water shortages devastated Sacramento Valley rice production in 2022.

Mexico is also one of the world's largest exporters of nuts, with the water-stressed region of Chihuahua a major source of walnut production in the country. During the past 30 years, total nut production has grown significantly in Mexico, with production increasing over 640% from 47,405 tons in 1992 to 304,747 tons in 2022. Walnuts alone have dominated the increase in tree nut production, growing from 2,900 tons in 1992 to more than 176,000 tons in 2022, according to USDA.

Large swaths of Mexican farmland, including regions around Mexicali and the Baja Peninsula are irrigated with water supplies that are not sustainable. The new CFWC fact sheet highlights the rising cost of food in America, UN projections of the growing global food demand, and that overseas producers are not required to meet the same health and safety standards that are common in California.

Planning for the Future

To protect America's food supply, elected officials and policymakers must consider the long-term effects of their actions. This means making more careful decisions about the policies and regulations that affect farmers who grow our food.

In California, we need to be doing things like investing in water supply infrastructure, such as Sites Reservoir, and in ecosystem efforts, like Healthy Rivers and Landscapes. Supporting sustainability for fish, waterfowl, and the farmers who grow our food helps protect Americans from disruptions in our food supply. And they're investments that make sense for all of California.

REGIONS

ACWA Region 2

Reimagining Paradise: A Tour of Renewal & Resilience

Thursday, June 27, 2024

Program Location: Paradise Elks Lodge #2026

1100 Elk Ln, Paradise, CA 95969

PRELIMINARY AGENDA

- 9:30 a.m. ***Check-in & Onsite Registration***

- 10:00 a.m. ***Welcome & Introduction***
 Cathy Green, President, ACWA & Eric Larrabee, Chair, Region 2

- 10:10 a.m. ***Rebuilding Paradise, A Tale of Community Strength***
 Speakers: Mickey Rich, Assistant District Manager, Paradise Irrigation District

 Collette Curtis, Recovery and Economic Development Director, Town of Paradise

 Monica Nolan, Executive Director, Paradise Chamber of Commerce & Mark Thorpe, Business Advocate, Paradise Chamber of Commerce

 Taylor Nilson, Executive Director, Butte County Fire Safe Council

- 11:40 a.m. ***Program Concluding Remarks***
 Ernie Avila, Vice President, ACWA

- 11:50 a.m. ***Bus Departs for Offsite Lunch Location***

- 12:00 p.m. ***Flowing Conversations: Networking Lunch***

Region 2 Board 2024- '25

Chair

Eric Larrabee, Western Canal Water District

Vice Chair

Josh Watkins, City of Redding

Board Members

David Coxey, Bella Vista Water District

Sean Earley, Richvale Irrigation District

Adam Robin, Yuba Water Agency

Dean Sherrill, Rio Alto Water District

Thank you to our event sponsors!

ACWA Region 2

Reimagining Paradise: A Tour of Renewal & Resilience

Thursday, June 27, 2024

Program Location: Paradise Elks Lodge #2026

1100 Elk Ln, Paradise, CA 95969

PRELIMINARY AGENDA

12:30 p.m. ***ACWA: Key Organization & Advocacy Priorities***

Speaker: Dave Eggerton, Executive Director, ACWA

12:45 p.m. ***ACWA JPIA Update***

Speaker: Kevin Phillips, Director of Member Outreach, ACWA JPIA

1:15 p.m. ***A Tour of Renewal & Resilience***

Town of Paradise: Firewise Neighborhood

Speakers: Mickey Rich, Assistant District Manager, Paradise Irrigation District

Taylor Nilsen, Executive Director, Butte County Fire Safe Council

Paradise Irrigation District: B Reservoir

Speaker: Blaine Allen, Engineer, Paradise Irrigation District

Paradise Lake: Fuel Breaks

Speaker: Taylor Nilsen, Executive Director, Butte County Fire Safe Council

3:00 p.m. ***Tour Concludes: Paradise Elks Lodge***

Bay-Delta Water Tour

May 15-17, 2024

FIELD TRIP

BAY-DELTA TOUR ITINERARY MAY 15-17, 2024

Follow us on

@WaterEdFdn

Foundation Team:

Bus 1

Nick Gray
Programs Director
530-433-4242

Kayla Sergent
Operations Manager
209-743-3358

Bus 2

Jenn Bowles
Executive Director
916-812-2643

Patrick Dunlap
Deputy Executive Director
916-233-5483

Resource Speakers:

Josh Israel
Chief, Science Division
Bureau of Reclamation, Bay-Delta Office

Mike Moran
Regional Interpretive & Recreation
Services Manager
East Bay Regional Park District

Jacob McQuirk (Wed)
Principal Engineer, Water Resources
CA Department of Water Resources

Bill McLaughlin (Thu)
Supervising Engineer, Water Resources
CA Department of Water Resources

Rosemary Hartman (Fri)
Environmental Program Manager
CA Department of Water Resources

TOUR MATERIALS

DAY 1: WEDNESDAY, MAY 15

7:30 a.m. CHECK-IN
Water Education Foundation, Sacramento

8:00 a.m. DEPART for Silt Wine Company

Jenn Bowles & Nick Gray

- Welcome & introduction to the tour

8:30 a.m. ARRIVE at Silt Wine Company
Opening Presentations of the Bay-Delta Tour

Mike Moran

- Unique geography & hydrology of the Sacramento-San Joaquin Delta
- Natural history of the Delta & its role in species migration

Jessica Pearson

Executive Officer, Delta Stewardship Council

- Overview of the Delta & its importance to California
- Today's Delta issues, its numerous players & plans & who is doing what
- Things to think about during the tour

10:00 a.m. DEPART for Jean Harvie Community Center
View of the Delta Cross Channel

David Ogilvie

Vineyard Manager, Wilson Vineyards

Director of Production, Ogilvie Merwin Vintners

- North Delta farming: past, present & future
- Water sources & regulations
- Voluntary water reductions

10:30 a.m. ARRIVE at Jean Harvie Community Center

Campbell Ingram

Executive Officer, Sacramento-San Joaquin Delta Conservancy

- Overview of the Delta Conservancy mission & history
- Conservancy's role in ecosystem restoration & economic development

Resource Speakers

- Water conveyance through & around the Delta
- The Delta Cross Channel & Georgianna Slough
- Salmon out migration impact on operations

11:30 a.m. DEPART for Delta Farmer's Market

12:00 p.m. ARRIVE for **LUNCH** at Delta Farmer's Market

Jay Ziegler

Delta Watermaster, State Water Resources Control Board

- Water rights & allocations in the Delta: a brief primer
- Role of the Delta Watermaster in administering water rights
- Proposals to implement the Bay-Delta Plan through Voluntary Agreements

1:00 p.m. DEPART for Big Break Regional Shoreline

Resource Speakers

- Salinity & tides where the Delta meets the Bay & Delta outflow requirements
- Drought barriers & Franks Tract Futures

1:30 p.m. ARRIVE at Big Break Regional Shoreline

Mike Moran

- Accessible Delta shoreline provides connection to larger Delta issues
- Open water, tidal sloughs, freshwater marsh & riparian areas support wildlife
- Delta Discovery Experience- a 1,200 ft² scale map of the Delta

Randall Neudeck

Bay-Delta Imported Water Supply Program Manager

Russ Ryan

Delta Islands Manager

Metropolitan Water District of Southern California

- The role of the Delta in Southern California water supplies
- Southern California perspectives on the Delta Conveyance Project
- Metropolitan's Delta projects, including islands purchased

3:30 p.m. DEPART for Twitchell Island

3:45 p.m. ARRIVE at Twitchell Island

David Julian

Senior Engineer, California Department of Water Resources

Tyler Anthony

Senior Environmental Scientist, California Department of Water Resources

- Delta levee special flood control projects
- Subsidence & mitigation
- Wetland restoration programs
- Greenhouse gas sequestration projects

5:15 p.m. DEPART for University Plaza Waterfront Hotel

Resource Speakers

- Delta smelt/fish habitat & wetlands
- Historical effects of island building
- Seismic risk
- Delta Conveyance Project & Peripheral Canal

6:00 p.m. ARRIVE at University Plaza Waterfront Hotel
Stockton, CA

6:15 p.m. GATHER for wine reception in the Waterfront Ballroom

6:30 p.m. DINNER in the Waterfront Ballroom

Jeanne M. Zolezzi

Partner, Herum\Crabtree\Suntag

- Stockton Area Water Suppliers: opportunities & challenges

Post-Dinner: 2024 Water Leaders cohort meets with Executive Director Jenn Bowles

DAY 2: THURSDAY, MAY 16

Load luggage on bus before breakfast & keep room key until departure.

7:00 a.m. BREAKFAST in the Waterfront Ballroom

Ivan Senock

Deputy Director, Restore the Delta

- The Delta as part of California's natural heritage & deserving of restoration

8:00 a.m. DEPART for Central Valley Project / State Water Project South Delta Facilities

TBD

South Delta Farmer

- South Delta agricultural concerns
- Crop management in a saline-rich environment
