Assistant Manager Johnson reported there was discussion on the Office of Inspector General report which recommended improving rate setting practices and estimates of future water deliveries, which resulted in elevated rates in 2016. Power customers have an exit option in 2019, and stated their analysis indicated hydroelectric is becoming economically infeasible. Director Watkins suggested discussing the directive from the Office of Management and Budget on recalculation on how rates are charged during the One Voice Trip. Dear Mr. Moody:

Words cannot begin to express our appreciation to the Stockton East Water District for once again permitting us to use the Bellota Intake Facility as a rest stop on Pedaling Paths to Independence. The venue offers safe, easy access to riders on the metric century.

Thanks to 314 registered riders, 70 volunteers, very generous sponsors, community partners, and product donors, Pedaling Paths to Independence raised a record \$24,509.00 this year to support programs and services for residents of the greater San Joaquin County area whose vision loss impedes their ability to perform tasks of daily living. Stockton East Water District has played a significant role in the event's success since 2010. We are grateful.

Thank you very much, again, for your philanthropy. We hope Stockton East Water District will continue its tradition at the tenth Pedaling Paths to Independence on February 24, 2018.

Sincerely,

Michelle M. Galvan, Executive Director

Subject: Response to Request for Consideration as Designated Non-Federal Representative in the Reinitiation of Consultation on the Coordinated Long-term Operation of the Central Valley Project and State Water Project

Dear Mr. Moody:

I am responding to your request to participate in the consultation process on the Coordinated Long-term Operation of the Central Valley Project (CVP) and State Water Project (SWP) as a Designated Non-Federal Representative (DNFR), as defined under the regulations implementing the Endangered Species Act (ESA).

As DNFR, you will be able to participate in updating portions of the biological assessment during the informal ESA consultation process. Staff members in your organization have a technical understanding of the CVP and SWP, its operation, and the associated biological processes in areas affected by operation of the CVP and SWP. This technical expertise will be a valuable asset in the consultation process. Moreover, the contractual relationships between your organization, the Bureau of Reclamation, and/or the California Department of Water Resources lead Reclamation to conclude that it would be appropriate to designate your organization as a DNFR. Please be advised that designation as DNFR allows for your representatives to participate during the informal consultation process only, which includes that period of time when the biological assessment is being developed. Other legislation or policies may also allow for your broader participation in the ESA consultation process.

I appreciate your interest in the consultation and look forward to your participation. Should you require additional information, please contact Ms. Katrina Harrison at 916-414-2425 or via email at kharrison@usbr.gov.

Sincerely,

Michelle Banonis

Subject: 2017 Water Year Delivery Schedule – Request for Approval Pursuant to Stockton East Water District (District) Contract Number 4-07-20-W0329 (Contract), East Side Division, Central Valley Project (CVP), California

Dear Mr. Moody:

This letter is in response to your letter dated October 11, 2016, which transmitted the District's proposed delivery schedule for January 1, 2017, through December 31, 2017. Your letter requested delivery of 28,000 acre-feet (AF) of agricultural water and 47,000 AF of municipal, industrial, and domestic water, for a total of 75,000 AF of interim water supply pursuant to the Contract.

Enclosed is the press release announcing the initial allocation for the CVP. As a result, the Bureau of Reclamation is approving the 2017 schedule submitted by the District pursuant to the Contract. Accordingly, please submit a written schedule to this office on or before March 8, 2017, and at such other times as necessary, showing the monthly quantities of CVP water to be delivered. We continue to monitor conditions and will update the District, if necessary, based on then-current operational and hydrologic conditions.

In a response letter to the District's 2015 water year delivery request (dated December 24, 2014), Reclamation did not approve the District's schedule of CVP water for January 2015. In a follow-up letter (dated January 30, 2015), Reclamation informed the District that any CVP water remaining at the end of the contract year of December 31, 2014, was not available for pumping in January 2015. According to our records, the District took delivery 2,656 AF of CVP water in

January and February 2015. Given the approval of the 2017 schedule, this unauthorized amount will be accounted for against the District's 2017 CVP water supply.

Please contact me at 916-989-7180 or e-mail dlessard@usbr.gov if you have any questions.

Sincerely,
